

What is a Farmers Market?

A farmers market is a public assembly of farmers and/or their representatives, selling food which they have produced directly to consumers (Farmers Market Coalition, 2013).

When can I shop at Farmers Markets?

Peak harvest season (summer) is usually peak market season. Some markets are only open in the summer, while some remain open year round. Reach out to local markets to find hours and seasons of operation.

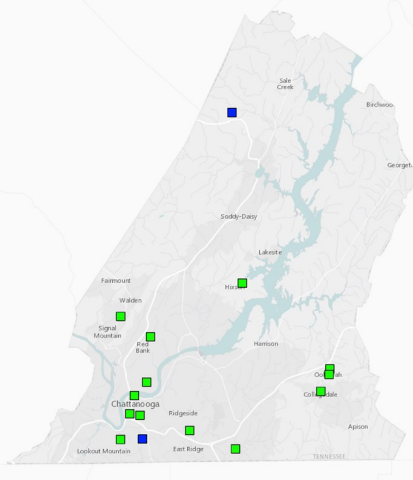

Are prices the same as grocery stores?

Farmers market vendors are local entrepreneurs who, like other retailers, set prices that allow them to cover their costs. While prices vary by product, a number of studies found that similar produce are typically less expensive at farmers markets than at nearby grocery stores.

Do Farmers Markets only take cash?

There are many ways to pay at farmers markets. Cash usually works best, but EBT, credit cards and WIC payments can be collected at most markets.
